DETAILED ACTION

The following is a response to the amendment received on January 24, 2005 which has been entered.

Response to Amendment

Claims 1-10 are pending in the application. Claims 7-10 are newly added.

-The 112 2nd rejection of claim 6 has been withdrawn due to applicant correcting the dependency of this claim.

Response to Arguments

Applicant's arguments, see page 7, filed January 24, 2005, with respect to the Fukumoto et al reference not having a manual setting device for adjusting the electric current of the valve have been fully considered and are persuasive. The 102(e) rejection of claims 1 and 5 has been withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-In claim 7, line 9, "tot, he" has been changed to --to the--.

Allowable Subject Matter

Claims 1-10 are allowed.

Art Unit: 3681

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or render obvious a motivation to provide for:

-(as to claim 1) a change speed system for a utility vehicle having a first engaging sub-process rapidly raising oil pressure to a clutch and a second engaging sub-process gradually raising oil pressure temporarily dropped subsequent to the first process in which a manual setting device is used to adjust an electric current value of a valve controlling the clutch in the second process in combination with all the remaining limitations of claim 1.

-(as to claim 7) a change speed system for a utility vehicle having a first engaging sub-process rapidly raising oil pressure to a clutch and a second engaging sub-process gradually raising oil pressure temporarily dropped subsequent to the first process in which a manual setting device is used to adjust an electric current value of a valve controlling the clutch in the second process and both sub-processes having a first and second controlling portion wherein the second controlling portion for the second sub-process offsets the amount of electric current relative to a reference control characteristic in response to the setting device in combination with all the remaining limitations of claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3681
